

H K Wentworth Limited

REACH compliance statement

H. K. Wentworth Limited trading as Electrolube, AF International and EuroChemi, is fully aware of the requirements of the new European REACH regulations and the dates by which various parts must be implemented. A team leader and task force has been set up and we are, and will be, working with both our raw material suppliers and customers to ensure full compliance with REACH at every stage.

We have ensured that all chemical substances we supply which require REACH registration have been pre-registered by ourselves or an upstream supplier, thus securing the benefit of the phase-in period. At this time, we do not anticipate any disruptions in continuity of supply to our customers due to this regulation.

We intend to meet all appropriate deadlines set by ECHA and hence all registrations will be complete by June 2018. We will ensure that all substances are registered for the uses described on the appropriate product technical data sheets.

As a formulator and blender of substances we will continue to communicate health and environmental information on the preparations we supply to customers through material safety data sheets, as required by REACH.

Should you require any further information please e-mail reach@hkw.co.uk
